## National Terrorism Advisory System Current Alerts

# SITUATION SUMMARY

## Butts Incident, Vegetation Fire, Napa County

### **Fire Information:**

- Per ICS 209 dated 07/02/14 at 0545 hours
- 3200 acres brush, 30% contained
- Structures Threatened: 380
- Structures Destroyed: 5
- Five Local Government Type Strike Teams assigned
- One OES Support Unit
- CAL FIRE IMT 5 has been activated
- Cal OES Assistant Fire Chief assigned
- Fire Management Assistance Grant (FMAG) was approved. FEMA-5057-FM-CA

### **Emergency Management:**

#### **Evacuations/Shelters**

- Approximately 200 homes in Berryessa Estates are evacuated to Middletown High School
- Approximately 50 residents from the Berryessa Estates chose to stay and were allowed to stay at their residence.
- Evacuation Shelter opened at Middletown High School; Overnight population: 30

# **SITUATION SUMMARY**

## **Significant Weather**

### **Heat:**

- Excessive Heat Warning remains in effect until 2200 hours this evening below 4000 feet for areas of Inyo and San Bernardino Counties.

### **Fire Weather:**

- A Red Flag Warning from 1300 hours to 2100 hours today for Shasta, Tehama, Humboldt, Lake, Trinity, and Mendocino Counties.
- A Red Flag Warning in effect until 2300 hours today for Siskiyou and Modoc counties.

# **SITUATION SUMMARY**

## **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought
- Mountain House Community Services District (MHCSD), San Joaquin County submitted a resolution declaring a water shortage emergency, stage 1 mandatory water conservation for MHCSD.
- Lodi City council submitted a resolution finding the existence of a drought emergency The Lodi City Council requests that federal and state agencies provide financial and other assistance to residents, water suppliers, water rights holders, ranchers, farmers, business owners, and any local governments who are harmed by the drought emergency in its territorial limits to help them mitigate the effects of the persistent drought conditions.
- City of Ripon has submitted a resolution ordering mandatory water conservation measures from June 1, 2014 through October 1, 2014 with no request for assistance.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

A series of disturbances passing over northwest California will generate isolated to scattered dry thunderstorms across interior locations this afternoon and early evening across interior portions of northwest California.

#### **San Francisco Weather:**

Little change is forecast through Friday. A relatively deep marine layer along with moderate onshore flow will result in widespread night and morning low clouds, along with patchy fog And drizzle near the ocean. Temperatures will remain slightly below normal in most areas through Friday. Warming is forecast during the upcoming weekend as an upper level high pressure ridge over the desert southwest builds to the west over California.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

Near to slightly above normal temperatures expected through Friday, then trending upwards and becoming hot by early next week. Dry weather expected except a slight chance of thunderstorms over the northern coastal mountains today, then a slight chance of thunderstorms over the Sierra by the middle of next week.

#### **Hanford Weather:**

Low pressure system passing to the north will bring breezy conditions to the west side of the San Joaquin valley this morning. Otherwise, above normal temperatures and mainly clear skies this week across the region under high pressure.

## **WEATHER SYNOPSIS BY REGION: (Cont.)**

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

A trough of low pressure will bring continued overnight low clouds and fog through at least Friday, with temperatures below normal for the coast and valleys and above normal in the interior. High pressure will build over the weekend and the marine layer may lessen along the beaches, with only minor temperature changes.

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

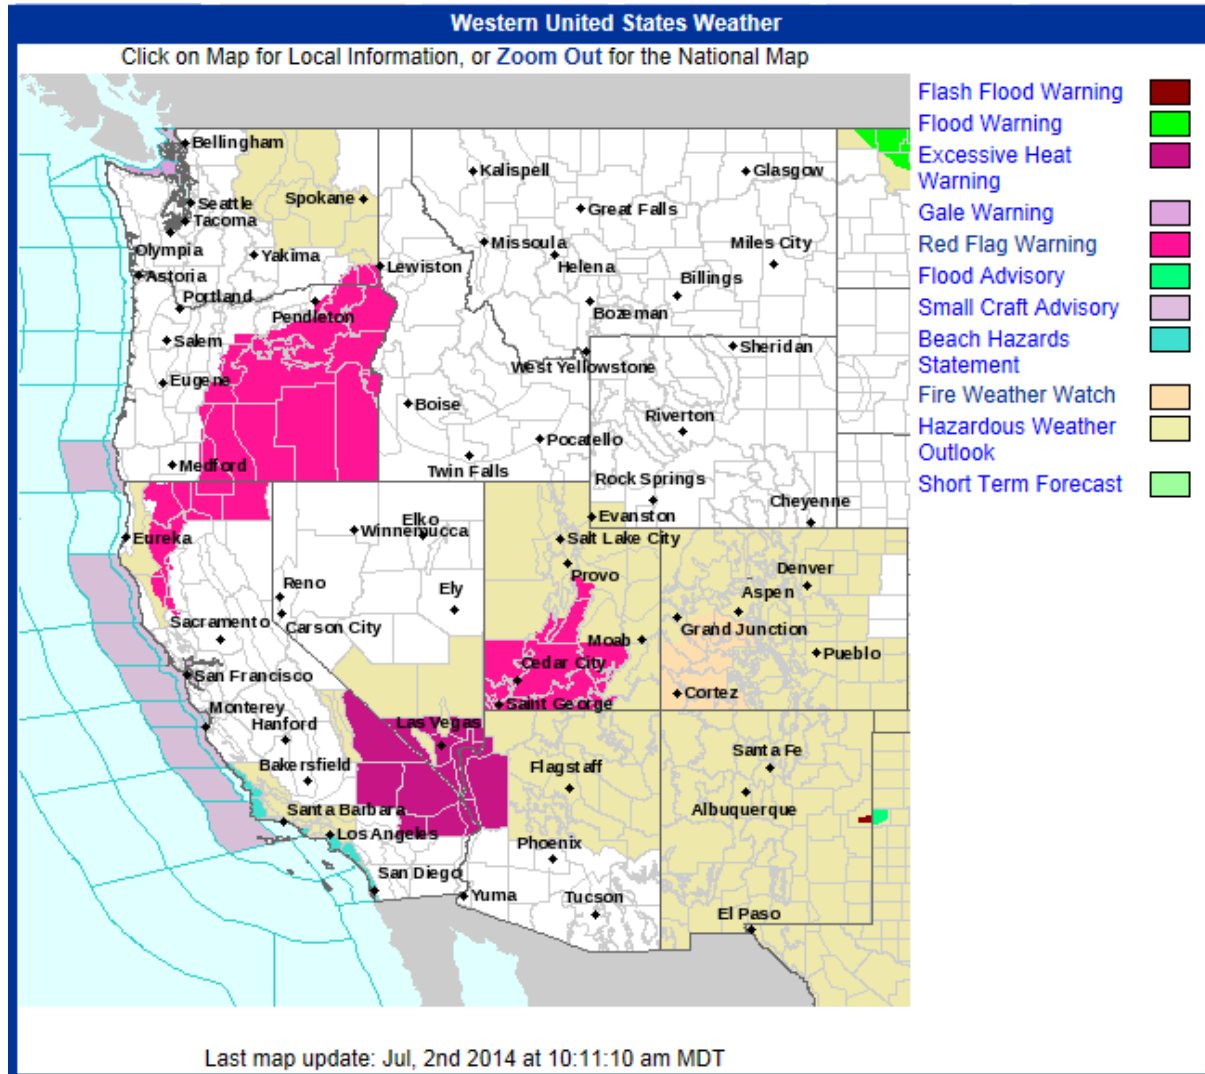

Daytime temperatures will remain near seasonal averages through Thursday, with a shallow marine layer bringing low clouds and fog to the coastal areas and portions of the inland valleys during the nights and mornings. Locally gusty west winds will develop in the mountains and deserts each afternoon and evening. Some sub-tropical moisture could move in from the southeast as early as Friday, increasing on Saturday. This will likely bring lots of mid and high clouds to the region, with a chance of showers and thunderstorms over the mountains on Saturday. Moisture and clouds decrease for the first half of next week.

#### **Southeast California Weather:**

One more day of mainly clear skies and above normal temperatures is expected today as high pressure remains over the region, with many lower desert locations reaching, or exceeding 110 for highs. A cooling trend is then expected to begin on Thursday, and then continue into the weekend as monsoon moisture, in the form of clouds, higher humidity and increasing storm chances, spreads northward into the region from Mexico. Storm chances peak for the Fourth of July holiday, where storms and their associated impacts could reach as far west as the lower Colorado River valley. Warmer temperatures and less monsoon activity is then expected for early next week as high pressure attempts to rebuild over the region.

# STATE WEATHER MAP

**Cal OES**  
GOVERNOR'S OFFICE  
OF EMERGENCY SERVICES

# California - North Area 7 Day Significant Fire Potential

## Legend

### Fuel Dryness

-  Moist - Little or no risk for large fires.
-  Dry - Low risk of large fires in the absence of a "High Risk" event.
-  Very dry - Low/Moderate risk of large fires in the absence of a "High Risk" event.
-  Data Unavailable.

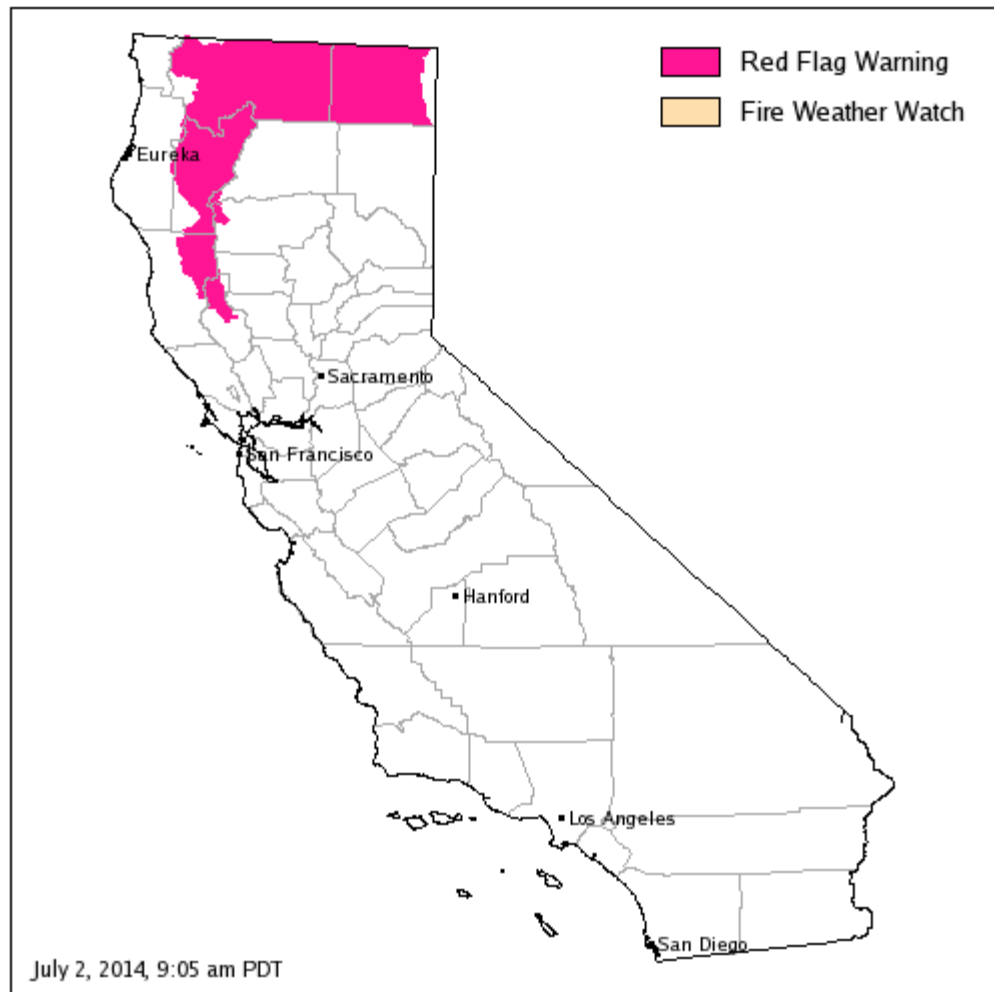

### High Risk Events

-  Wind
-  Hot and Dry
-  Lightning

Predictive Service Area	Tue Jul 1	Wed Jul 2	Thu Jul 3	Fri Jul 4	Sat Jul 5	Sun Jul 6	Mon Jul 7	Tue Jul 8
NC01 - North Coast								
NC02 - Mid Coast								
NC03A - Bay Area-Marine								
NC03B - Diablo/Santa Cruz Mtns								
NC04 - Northwestern Mtns								
NC05 - Sacramento Valley								
NC06 - Northeast CA								
NC07 - Northern Sierra								
NC08 - East Side								

Isolated thunderstorms Tuesday produced mostly dry lightning activity in 3 of the 4 Predictive Services Areas (PSAs) highlighted as High Risk. There were over 250 total NOPS strikes, producing over 25 known new fires as of mid Wed. morning. The axis of the upper ridge has now shifted east to lie over the central Great Basin, leaving NOPS under a SW flow aloft. There is a weak, trailing Pacific trough headed west-to-east into OR, that will brush the northern third of NOPS late today. This will cause a second day of isolated (still fairly dry) thunderstorm chances, though today they are forecast to be confined to in or near, the counties bordering Oregon. In the eastern part of NOPS, Lassen Co. southward looks just stable enough to NOT get new/ additional lightning activity today.

# FIRE ACTIVITY

## Butts Incident, Vegetation Fire, Napa County

### **Emergency Operation Center (EOC) Activations:**

- Napa County OES is currently at duty officer status.
- Lake County OES is currently at duty officer status.
- Cal OES Coastal Region is currently at duty officer status.

### **Cal OES Law Enforcement Branch**

- Napa County Sheriff is not requesting any assistance but Cal OES LDO and Region 2 LE Coordinator have been in contact with the Regional Mutual Aid Coordinator (RMAC), Alameda County Sheriff, and will continue to monitor the fires progress.

### **Critical Infrastructure**

- Public Safety Communications has assigned three technicians.

# CAL OES ACTIVATIONS

## Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is 0800-1700 hours.

### **Situational Summary**

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

On April 25, 2014 Governor Brown released an Executive Order on Friday enabling several urgent actions to be taken as the drought persists into the state's traditional dry season.

**\*\* As this rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly over the coming months. This winter's below average rain and snowfall worsens conditions in this third straight dry year.\*\***

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.

# **CAL OES MISSIONS**

## **New Cal OES Missions**

**2014-LAW-3966**, 7/1/2014, 1614 hours, The International Emergency Response Coordination Center(IERCC) advises a SPOT-911 activation occurring in Tulare County. LDO talked with Tulare County Sheriff's Dispatch and learned they had initially received a report from the Forest Service of a traffic accident involving a motorcycle rider in the area of Road M99 south of Sherman Pass Road. They advised a Tulare Deputy was on scene of the traffic accident and learned the father of the injured son involved in the motorcycle accident had activated his SPOT device because he had no cellular phone service in the area and was unaware that a third party had reported their accident to the Forest Service. The injured 20 year old male was transported via ambulance to San Joaquin Memorial Hospital in Bakersfield for non-life threatening injuries. The SPOT device was deactivated and LDO updated IERCC. **Mission Closed**

## **On-Going Cal OES Missions**

**2014-LAW-3961**, On behalf of Fairfield Police Department, Solano County Sheriff is requesting one Human Remains Detection (HRD) K9 to assist in a 30 year cold case homicide. The request is for Wednesday, July 2, 2014, with a 0900 briefing at an off-site Fairfield Police Department building in Fairfield, CA. Cal OES Law Enforcement Branch is coordinating the response. Mission Ongoing

**Mission:**

We protect lives and property, build capabilities, and support our communities for a resilient California.

*We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.*
